effects of controlling central air conditioning and water heating on distribution system design and cost-effectiveness 3−32324
electric power, economic dispatching, optimal control theory 3−15927
electric power system, structuring from control point of view *(German)* 3−32336
electromechanical transient central system synthesis *(Russian)* 3−15892
emergency control techniques 3−27612
energy management controls 3−15941
equipment designs for a two-way mainsborne signalling system of energy management 3−10409
Eurodif plant electric power supplying installations operation *(French)* 3−32375
fibre optic control of electrical power generation and delivery 3−15888
forming the control influences during control of power systems under fault conditions *(Russian)* 3−4864
front end electrics in South African collieries−protection, control and operating parameters 3−21680
guided missile frigate, elec. plant supervisory control system, USA 3−22407
high-order system reduction, compensator design appl. 3−15950
homeostatic control for electric power usage 3−4908
Hungarian power system, self tuning load frequency control 3−4931
HVDC control, telecommunication channels 3−27786
HVDC systems, subsynchronous oscillations damping control 3−32365
hydraulic resources optimal control, fuel saving 3−10396
identification and control of the mid-term dynamic behaviour of electric power systems 3−27662
improved automatic meter reading and load control system and its operational achievement 3−10601
